

WE ARE
ABOUT TO
REVOLUTIONIZE
STEELMAKING

Fossil-free steel in 2026
Fossil-free company by 2045

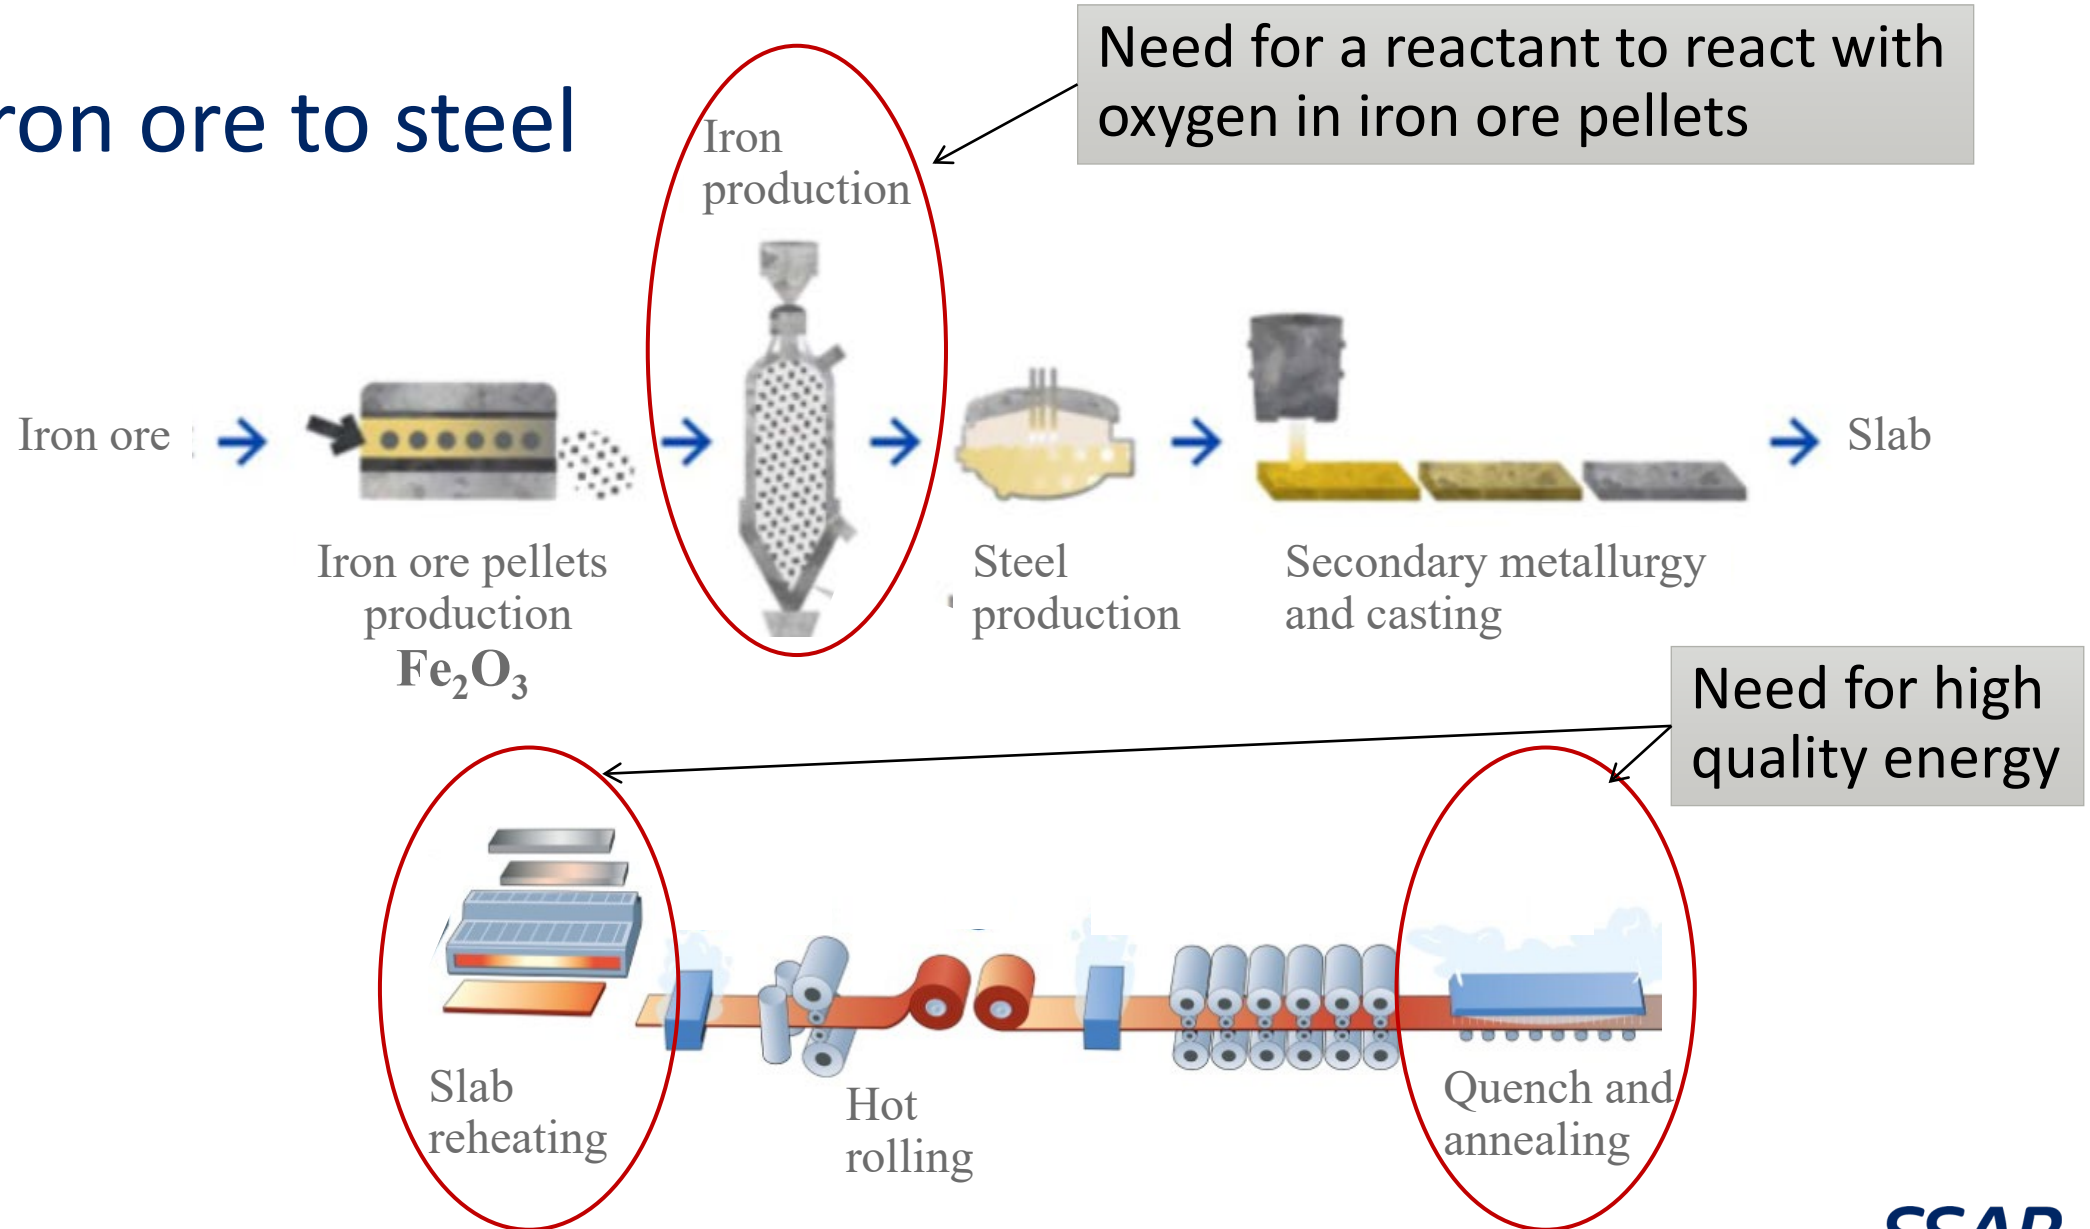

Market introduction

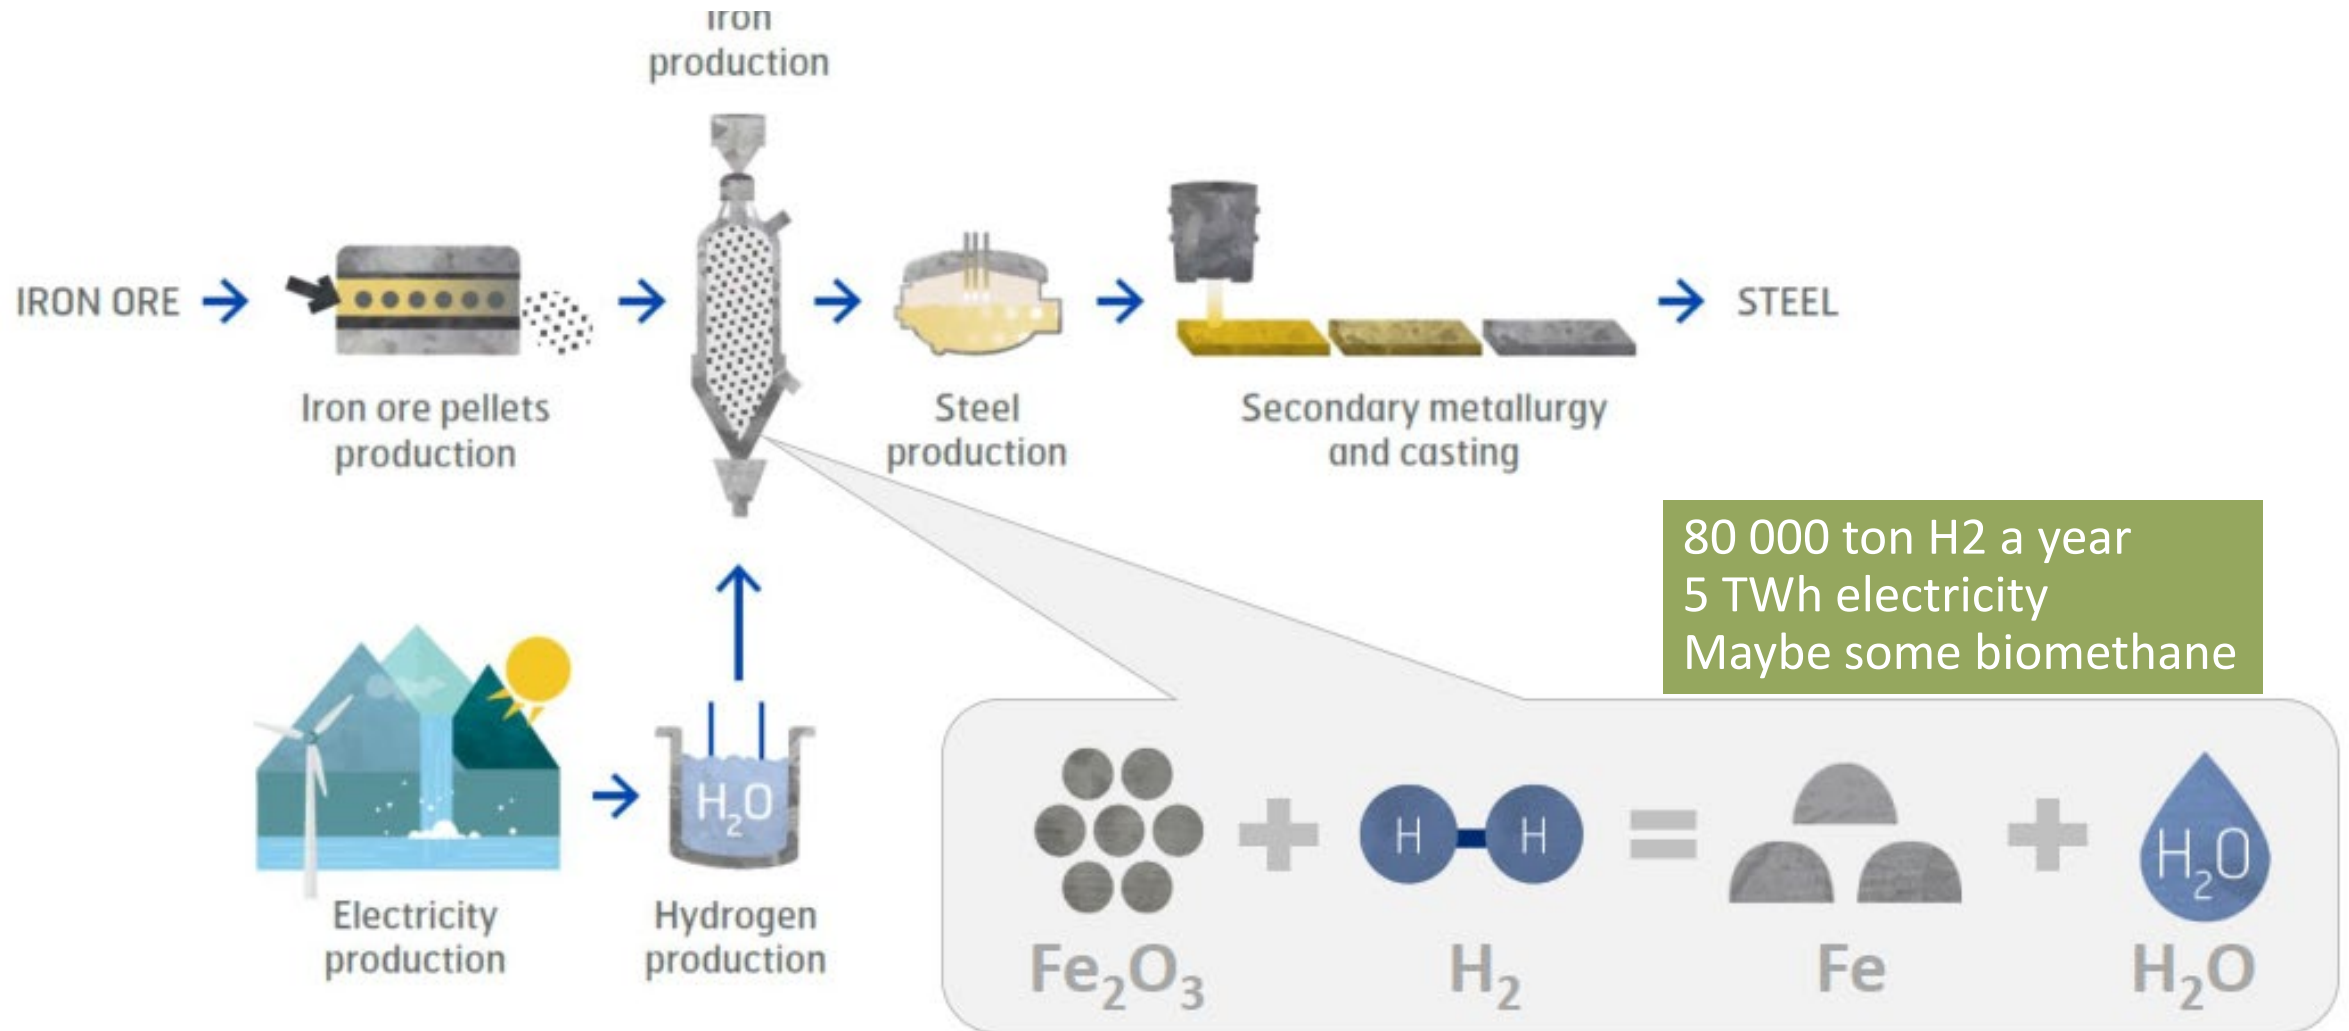

Conceptual vehicles introduced **2021**. Small scale series production from **2022**

SSAB

From iron ore to steel

Emissions from iron production is eliminated with hydrogen...

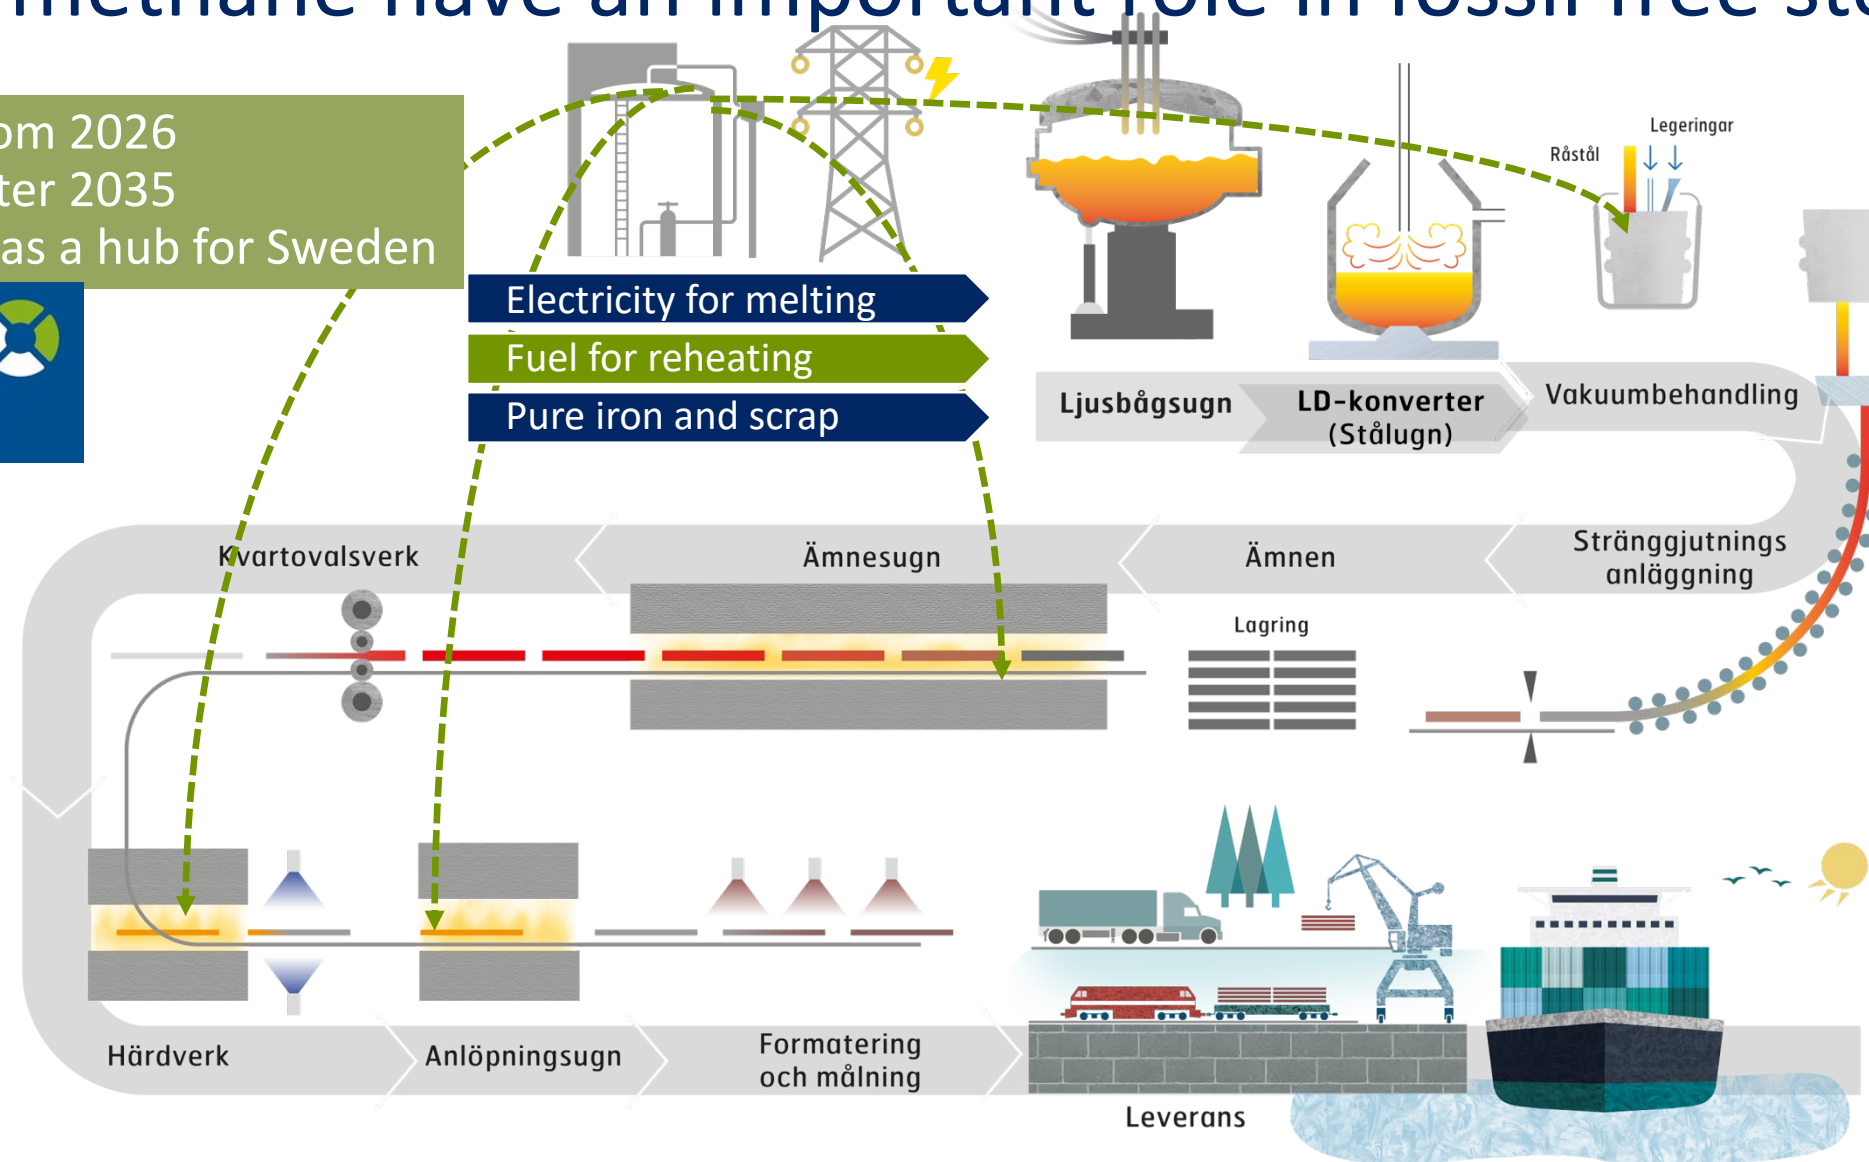

Unique high strength steel

- 
- ▶ Heating and cooling is the shit making high strength steel
 - ▶ High temperature, complicated processes
 - ▶ Pure, fossil free gasues energy manage **all** demands

Bio-methane have an important role in fossil free steel

0,5 TWh from 2026
1,5 TWh after 2035
Oxelösund as a hub for Sweden
